User Interface Assignment

Due Date:
See assignment

1. A cover sheet containing your name, class time, title of report and class number (ITSE 1450) In this assignment, you are describing how the user of your project will navigate your system to get their work done.

2. Provide readable screen shots of each of the input screens you will use – an in proportion drawing is acceptable too. Identify each screen shot as input.

3. Provide readable screen shots of each of the output screens you will use – an in proportion drawing is acceptable too. Identify each screen shot as output.

4. Explain why you chose the graphics that you selected to use

5. Explain why you chose the colors that you selected to use – was there a color set? Or color preferences by your "user"

6. Explain why you chose the font face, font sizes and font formatting that you chose to use.

7. List any input controls you used – buttons, checkboxes, radio buttons, dropdown lists, list boxes, toggles, text fields, date field.

8. Describe the navigation (buttons, links, etc) you have chosen for the project.

9. What navigational components did you include in your interface – breadcrumb, slider, search field, pagination, tags, icons

10. List any informational components you provided in your interface – tooltips, progress bar, notifications, message boxes, modal windows, icons

11. Go through the User Interface Checklist (attached to the assignment). Each Pass element, assign a point to. Then total up your points and provide it in this document.
